CASE STUDY

## PROJECT DETAILS

**Project Name:**
Highway Q
Pelican Lake Residence

**Location:**
Wisconsin

**Contractor:**
PSI Concrete

**Product Used:**
Ready-Mix Concrete

**Manufacturer:**
County Ready Mix Corporation

# Northwoods Driveway Brought to Life with Decorative Concrete

**Solutions:** Colored ready-mix concrete provides a durable, all-weather surface for a Northwoods driveway

County Ready Mix supplied a high-quality concrete mix for a driveway project near Pelican Lake in Northern Wisconsin. The inherent durability of ready-mix concrete makes it a reliable solution in the upper Midwest, where harsh winters can shorten the service life of other materials. Ready-mix requires minimal maintenance and resists age and wear for decades, making it a cost-effective choice.

The homeowner chose black concrete for its decorative look and to help melt snow on sunny winter days. The contractor poured 100 CY of 4,500 psi ready-mix for the 5,000 SF driveway and approaches. County Ready Mix provided quality control services during the multi-day installation to ensure color consistency. Specially formulated pigments from Butterfield make integral concrete coloring simple and effective.
